Software Engineer

Technologically sophisticated software developer with proven expertise in problem solving and critical thinking. I use my previously established skills in troubleshooting to identify problems before there are issues and resolve faults if issues do occur. A background in high stress high risk repair assists in maintaining an upbeat and positive attitude in any working environment. As a web developer, I actively seek opportunities to continue to grow my software engineering skills to ensure quality, polished code.

Skills

- Team Leadership & Training
- JQuery
- Node
- Problem solving
- HTML , CSS , JavaScript
- SQL
- Project Management
- MongoDB
- React

PROFESSIONAL EXPERIENCE

OZTEK COMMERCIAL SERVICES
